The Libra XT Double Kayak

The Libra XT touring double has all the features you need for extensive touring or family outings. The large middle cockpit can accommodate a child to make the XT a triple kayak, or carry a raft of expedition gear for the most luxurious adventure. Long and deep, the Libra XT will always give you a comfortable ride. The watertight bow and stern compartments, along with the self-contained middle compartment, offer tremendous storage capacity.

The Libra XT's efficient hull design makes it easy to paddle and provides ample stability. A unique rudder uphaul/downhaul lever system makes rudder use a simple matter, giving you greater control and responsiveness.

The XT has proven itself with many tour operators where safety, seaworthiness, comfort, carrying capacity and quality construction are highly important.

This high volume Libra XT comes equipped with two mid-bulkheads in addition to the bow and stern bulkheads to close off the center cockpit area.
