

- **Best for paddlers**
approximately: 110-210 lb.
- **Maximum Load**
(paddler plus gear): 325 lb.

Oracle GTS

The Oracle GTS is a North American Style design for paddlers who prefer a smaller kayak. This is a fast, straight-tracking design with a lively feel. Like its Solstice cousins, it is an efficient fish-form kayak that handles well in rough water. And while sleek, there's plenty of room for gear when paddling on longer trips.

Features include a flush bow hatch, a rubber stern hatch, recessed fittings, and

full reflective perimeter lines. Mid-deck bungee, complete with a paddle shaft recess making paddle float rescues a snap. Also standard is the SmartTrack rudder with toe-control foot braces for a solid feel.

This kayak comes only in our proprietary TCS™ construction. We also use our innovative seaming technology that uses an interior shoebox seam that is exceptionally strong.
